Clinical Updates: Printed Dentures and Functional Orthodontic Therapy

I expect printing to continue to improve and evolve in the coming years. Since it's induction in recent years, printed dentures are becoming commonplace now. Printing allows us to copy current dentures, reducing the number of appointments. It's also a nice option to keep a digital "copy" of your current denture in case it's ever lost, a replica could be easily ordered. Dr Dulac has been an Invisalign provider since 2014 when he got out of the military, but Dr Dulac also offers comprehensive orthodontic therapy to children and teens of all ages, including functional orthodontic therapy to aid in jaw growth and development and minimize the cost of full orthodontic therapy later.
