

## Looking back at 2024, And ahead to 2025

### Dulac Dental at Work in the Community:

In 2024, with the help of our patients we donated food and funds to Food for Others for Thanksgiving, donated toys to Mobile Hope for Christmas, supported the 18 Hole Ladies Group at Springfield Golf and Country Club and the Springfield Civic Association, and educated Kindergartners for Dental Health Month at Lynbrook Elementary School.

### Dr Dulac Teaching at the International Implant Institute!

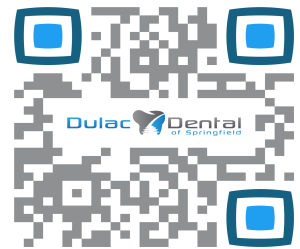

Dr Dulac has been a leader in implant dentistry for a number of years and is now on faculty at the International Implant Institute. This will not take away from his clinical hours at the practice and will involve a number of weekend lectures in 2025.

### Clinical Updates: Waterlase Laser added in 2024 !!!

We added a new laser to the office in 2024. It works by “cutting” with laser- activated water. It’s pain-free for many procedures. No stitches. No bleeding. In addition to being great for soft tissue surgery (skin tags, gum surgery, tongue ties) it can also be used for **small cavities in kids (and some adults) without numbing** and atraumatic extractions.

### Office Updates

We closed for 2 weeks in 2024 to update our plumbing, once to fix a cracked cast pipe and again to fix a bowed (bellied) PVC pipe, following these repairs, we’re hopeful all the plumbing annoyances that have plagued the office are finally in the past.

### MAGD: Master of the Academy of General Dentistry

In 2024, Dr Dulac completed over 1500 hours of CE (since he graduated in 2009), over 500 of which were hands-on, across 20 disciplines of dentistry, qualifying him for his MAGD, which will be awarded in 2025. Less than 2% of dentists have achieved this distinction.

### Make 2025 Your Year to Get and Keep your Teeth Healthy

Get yourself a Sonicare, stay on top of your cleanings, and if you were waiting until January for insurance rollover to resume needed dental care, call us to make an appointment!
